

This week in class we learned about the basics of Photoshop and how to set up our canvases for the needs of our projects. For this project, you turned a basic photo that we edited in a previous class into a Kaleidoscope-esque artwork.

You will be writing an artist statement after completing your project, using following questions as a guide:

1. How did you make this project? What were the steps that you used to achieve your kaleidoscope?

2. What happened to your original photo after applying all of the steps?

This should be a short paragraph, about 4-5 sentences long.

I made this project with adobe photoshop.what I did was look for an image that reminded me of fall. I picked the one that reminded me of Gilmore Girls. I filtered the image and then I duplicated a few times. I then rotated them.
